Displaying database data on website

python -m CGIHTTPServer 8000

in web browser localhost: 8000

in python file access.py

```
#! /usr/bin/python

print "Content-type: text/html"
print
print "<title>Test CGI</title>"
print "<p> Hello World!</p>"
```

mkdir cgi-bin, put access.py in directory
give permissions to access.py

```
ls -l access.py
chmod u+x access.py
```

go to localhost: 8000/cgi-bin/access.py

SQL
    source file
    make user

python file
    after shebang
    import MySQLdb

```
db= MySQLdb.connect(host = "localhost", user= "liz",
                        passwd= "test", db= "shirts4mike")
```
